
1985-2010: 25th Anniversary of the Insignis Honors Program

The Insignis Program was designed as a place for high-achieving students to do a different kind of work, rather than just more work, through offbeat seminars and the opportunity for individual work at the senior level, while also providing a place for academic-focused students to socialize and connect.

Insignis Fun Facts

- **1984:** Gary Eberle began the discussion regarding resources spent at Aquinas on high achieving students compared to low achieving students.
- **1985:** The program begins with 12 students. The first seminar is called "Everything you know may be wrong."
- **About 1990:** Gary Eberle, Mike Blomme, Char Griffin, and Paula Meehan designed the Spectrum Scholarship Competition in an attempt to bring more high-achieving students with leadership skills to Aquinas.
- **1990s**

"Insignis made my experience in Aquinas richer: it gave the eggheads an opportunity to get to know each other better, to celebrate geekdom, and to be involved in something." - Jason Tylenda '97

"I think Insignis helped broaden my learning experience, exposing me to things I wouldn't have been exposed to - such as an independent project in Biology and unique classes such as one on African history/culture." - Siobhan Kent '99

"Being in Insignis gave me confidence as I left Aquinas." - Nora (Veine) Berninger '93

"I joined because I wanted to be able to be part of something special and elite in college. I wanted to separate myself from the average student." - Edward Seymour

"I joined Insignis because I was hoping to take classes with students who I could learn from and who wanted the most out of their college experience. I most looked forward to being a part of a smaller community within the AQ community with other students who valued knowledge and service, as well as an academic challenge." - Kristina Krausman
